THERAPIST® is a patented medical device for magnetotherapy. Due to its innovative technological characteristics, concentrated in a very small space, it represents a true revolution against pain, trauma and fractures. Unlike other magnetotherapy devices which are complex to apply and program, THERAPIST® is the only one with an integrated solenoid and which does not require selection of specific programs.

Exploit the benefits of magnetic fields for fractures and osteo-articular treatments

THERAPIST® is equipped with two rolling code programs, unlike all magnetotherapy devices with fixed frequency programs. This technology allows you to improve the effectiveness of the treatment and also prolongs its duration, as validated by Dr. Emilio Battisti, an expert in magnetotherapy from the University of Siena.

A study carried out by researchers at INOVALAB, a spin-off of the University of Studies in Padua confirmed that THERAPIST® is more powerful than traditional devices with wire solenoid.

reduced dimension, more power

PATENTED

MADE IN ITALY

The only all-in-one device

THERAPIST® is all in one and doesn't need anything else to be powerful and effective. No more wires, accessories and complications!

100% Made in Italy

THERAPIST® is a device with an exclusive technology that uses latest generation electronic components. It is equipped with a patented solenoid capable of reaching higher power parameters compared to most professional devices equipped with external solenoids. However, the small size ensures simplified use of the therapy.

9 cm

13,5 cm

a therapy in your hands

Where you want, when you want

THERAPIST® is a faithful ally. Thanks to its pocket size and long-lasting battery, it can be taken anywhere and used in maximum comfort, even over clothes. It does not emit noise or annoying vibrations.

Iconic design

THERAPIST® is recognizable at first sight by its ergonomic shape, designed by a team of specialized Italian designers.

1 Acute Pain

Rheumatoid arthritis,
Epicondylitis
Acute low back pain
Acute algodystrophy
Periarthritis
Carpal Tunnel Syndrome
Tendinitis
Trauma

2 Chronic Pain

Arthrosis
Muscle strain from sports
Arthrosis
Chronic cervicobrachialgia
Pain from Fibromyalgia
Fractures
Chronic algodystrophy
Osteoporosis

two innovative
programs to ensure
maximum effectiveness

An intelligent device

THERAPIST® is able to autonomously deliver the most suitable magnetotherapeutic frequency to intercept the pathology to be treated, thanks to its innovative technology.

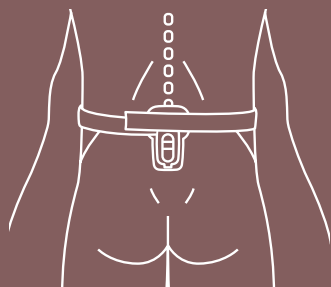

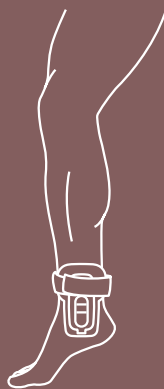

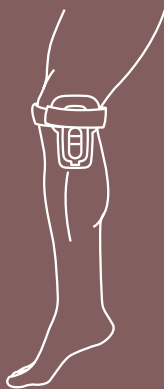

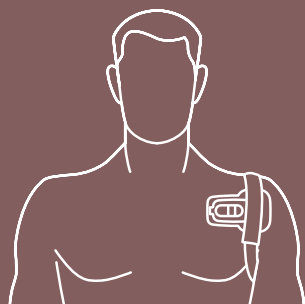

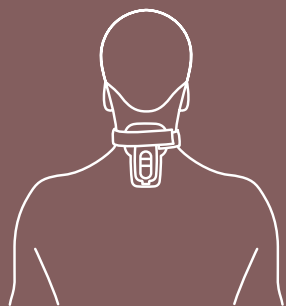

Simple like no other

THERAPIST® does not require programming and is therefore very simple to use. You just need to know if your pain is acute or chronic/fractured. Then let it take care of the rest!

therapeutic application

Some examples

THERAPIST® allows for easy application thanks to the appropriate elastic band. It can be placed directly over clothes or cast.

CE Medical Device – Carefully read the warnings or instructions for use.
This therapy is prohibited for individuals with pacemakers and is not recommended for pregnant women, or those with electrical and/or acoustic prostheses. Do not perform this therapy simultaneously with TENS and/or HOLTER devices.

app dedicated

Interactive

THERAPIST® is a smart device! Thanks to its app it communicates with your smartphone providing you with all of them in real time information about treatment in progress. Via the app dedicated you can check the programme in use, the duration of therapy and the battery status.
